 李妤晨 112255011@nccu.edu.tw

本次助教課重點

- 考古題講解：
- 2023年期末考第2題
- 2022年期末考第1題
- 2022年期末考第6題
- 2022年期末考第7題
- 2022年期末考第8題
- 2022年期末考第9題
- 2022年期末考第17題
- 2020年期末考第8題

2023年期末考第2題

2. (12%) In an economy, the supply curve of labor, S , is given by:

$$S = -100 + 200w_n$$

Where w_n is the after-tax wage rate. Assume that the before-tax wage rate is fixed at 20.

- (a) (6%) Write a formula for tax revenue as a function of the tax rate, and sketch function in a diagram with the tax rate on the horizontal axis and tax revenues on the vertical axis.
- (b) (3%) Suppose that the government imposes an labor income tax with a fixed rate of 30 percent. How much is the tax revenue?
- (c) (3%) At what tax rate are tax revenues maximized?

2023年期末考第2題

2. (12%) In an economy, the supply curve of labor, S , is given by:

$$S = -100 + 200w_n$$

Where w_n is the after-tax wage rate. Assume that the before-tax wage rate is fixed at 20.

- (a) (6%) Write a formula for tax revenue as a function of the tax rate, and sketch function in a diagram with the tax rate on the horizontal axis and tax revenues on the vertical axis.

稅額 = 單位稅額 $\times$ 稅基

單一稅率： t ； $W_n = (1 - t) \times 20$ ；單位稅額： $20t$ ；稅基： S

$$TR = 20t \times [-100 + 200(1 - t) \times 20] = 78000t - 80000t^2$$

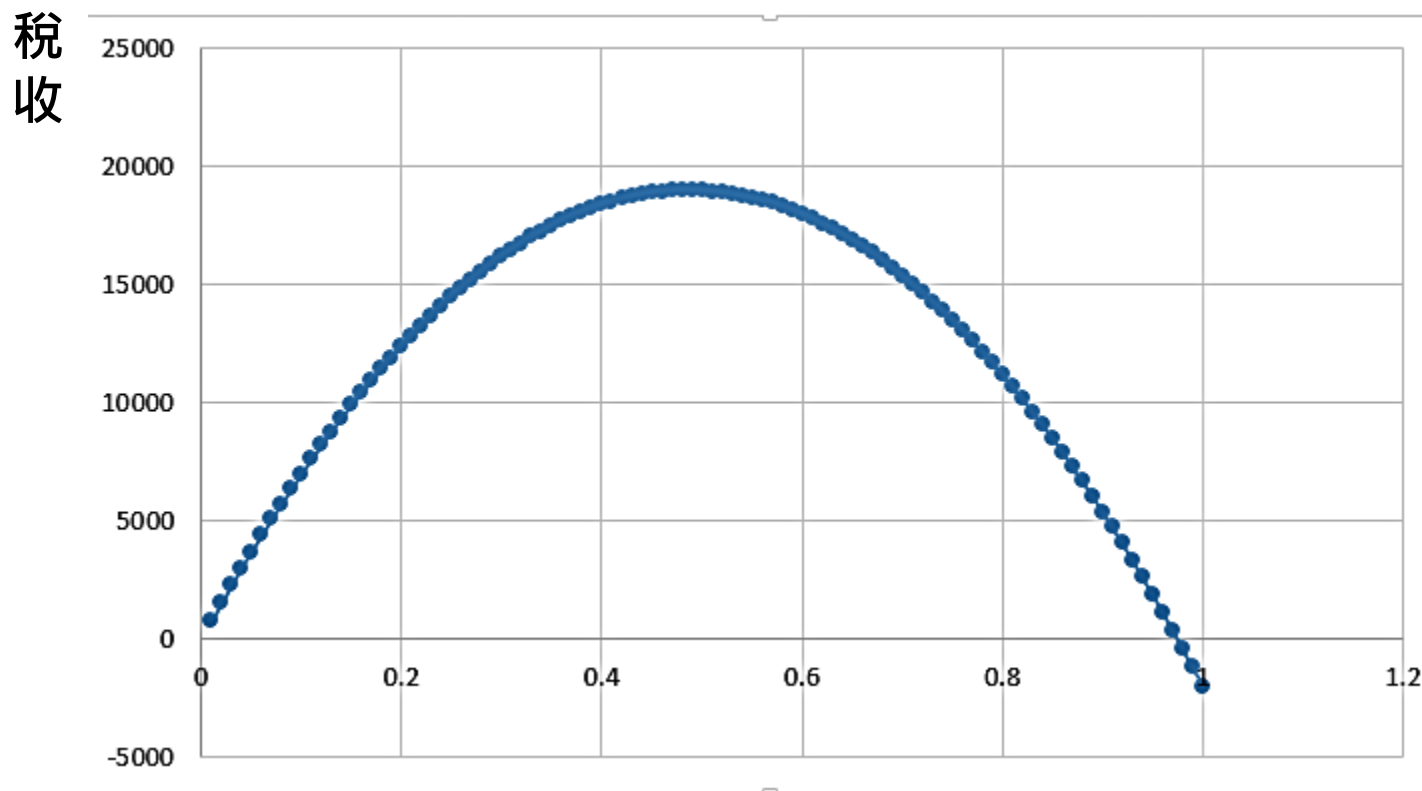

2023年期末考第2題

稅額 = 單位稅額 $\times$ 稅基

單一稅率： t ； $W_n = (1 - t) \times 20$ ；單位稅額： $20t$ ；稅基： S

$$TR = 20t \times [-100 + 200(1 - t) \times 20] = 78000t - 80000t^2$$

稅率
10%=0.1表示

2023年期末考第2題

2. (12%) In an economy, the supply curve of labor, S , is given by:

$$S = -100 + 200w_n$$

Where w_n is the after-tax wage rate. Assume that the before-tax wage rate is fixed at 20.

- (a) (6%) Write a formula for tax revenue as a function of the tax rate, and sketch function in a diagram with the tax rate on the horizontal axis and tax revenues on the vertical axis.
- (b) (3%) Suppose that the government imposes an labor income tax with a fixed rate of 30 percent. How much is the tax revenue?

$$TR = 20t \times [-100 + 200(1 - t) \times 20] = 78000t - 80000t^2$$

$$t=0.3 \text{ 代入, } TR=16200$$

2023年期末考第2題

(c) (3%) At what tax rate are tax revenues maximized?

$$TR = 20t \times [-100 + 200(1 - t) \times 20] = 78000t - 80000t^2$$

TR對t做一階微分等於0

$$t = \frac{78}{160} = 0.4875$$

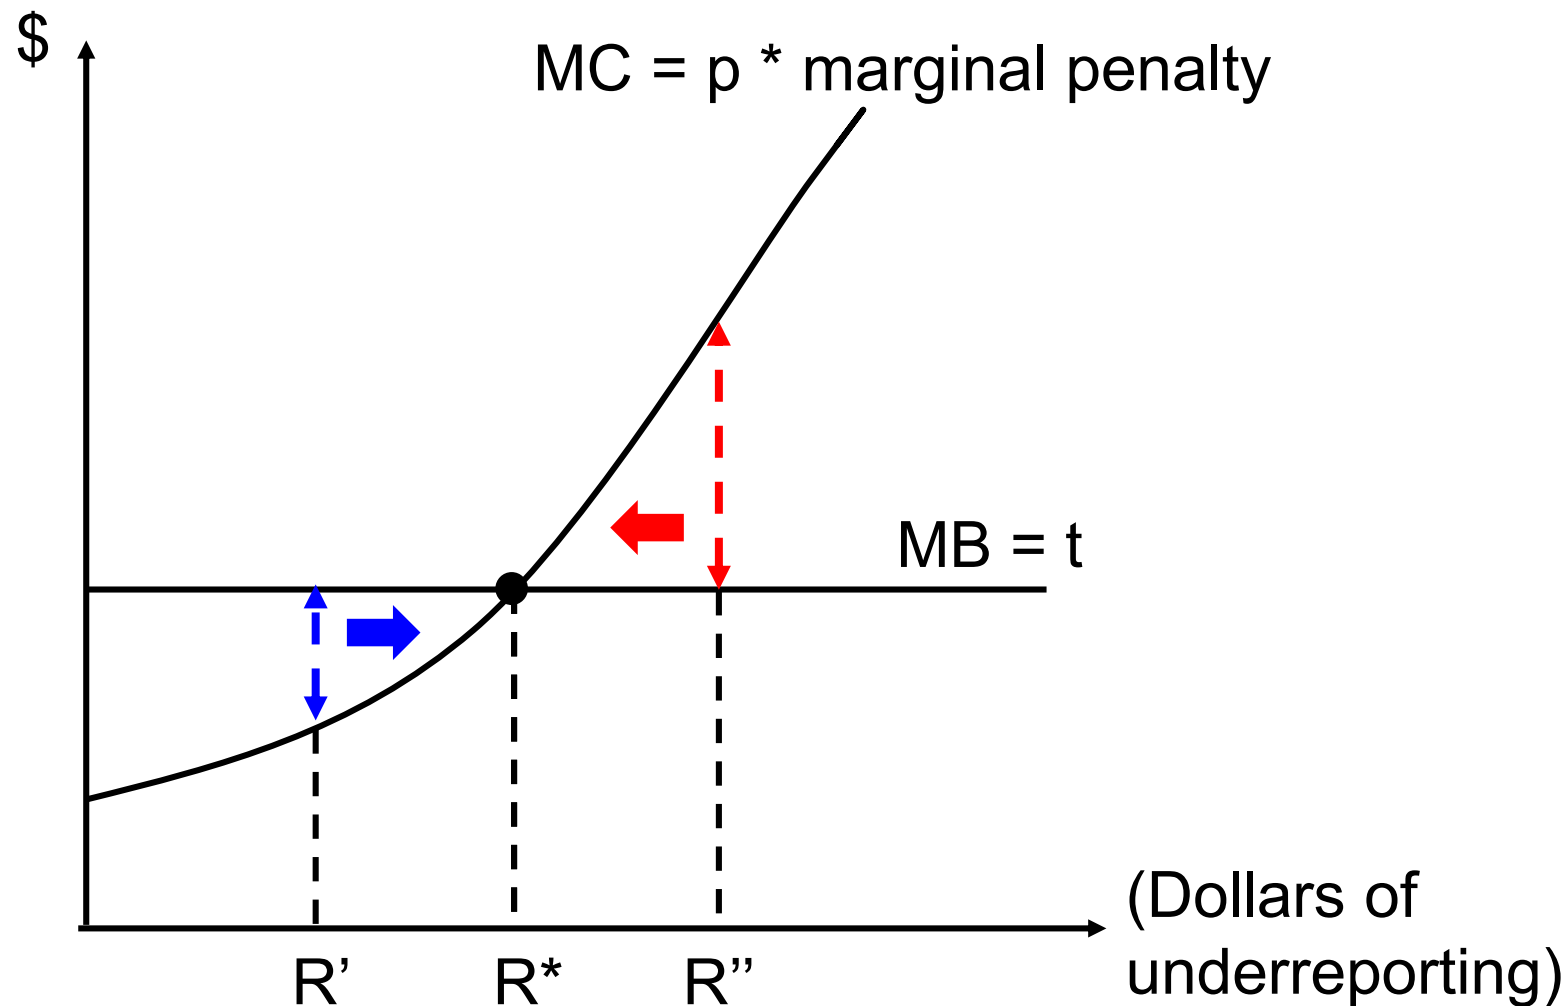

2022年期末考第1題

1. What will make the tax evasion **increase**? Use the tax evasion model to answer this question.

- A Increase marginal tax rate.
- B Increase marginal penalty.
- C Increase probability of audit.
- D Decrease marginal tax rate.

Answer: A

2022年期末考第6題

6. Suppose that a typical taxpayer has a marginal personal income tax rate of 40 %. The nominal interest rate is 15%, and the expected inflation rate is 5%. What is the real after-tax rate of interest? Suppose that the expected inflation rate increase by 4% points to 9%, and the nominal interest rate increases by the same amount. What happens to the real after-tax of return?

A 4%, 2.4%

$$15\% \times (1 - 40\%) - 5\% = 4\%$$

B 4%, 3.6%

$$(15\% + 4\%) \times (1 - 40\%) - 9\% = 2.4\%$$

C 6%, 2.4%

D 6%, 3.6%

Answer: A

2022年期末考第7題

7. Which of the following statements about personal income tax is **false**?

A Deductions make a poor person (with a low marginal tax rate) benefit less than a rich person (with a high marginal tax rate).

B Tax credits provide uniform benefits to all individuals.

C To adjust ability to pay, a deduction is appropriate.

D To encourage certain behavior, it is clear that credits are superior.

Answer: D

2022年期末考第8題

8. Which of the following statements about the effect of the Earned Income Tax Credit (EITC) on labor supply is **false**?

A A person who was not working before the EITC now faces a smaller (can be negative) marginal tax rate if he/she decides to enter the labor force.

B A low-income person who already worked and was in the phase-in range of EITC faces a substitution effect which makes him/her work less.

C A low-income person who already worked and was in the phase-out range of EITC faces a higher marginal tax rate.

D The EITC appears to have had little impact on total hours of work. The positive effect in the phase-in range was canceled out by the negative effect in the phase-out range.

Answer: B

2022年期末考第9題

9. Which of the following statements about optimal user fee is **correct**?

A Marginal cost pricing rule is inefficient with positive profits.

B Pricing rule for monopoly market is $P=MC$, which is efficient.

C Average cost pricing rule is inefficient but break even.

D In real world scenarios, in most cases, the publicly owned enterprises have selected marginal cost pricing.

Answer: C

	利潤極大訂價	邊際成本訂價	平均成本訂價
訂價方式	$MR = MC$	$P = MC$	$P = AC$
效率性	NO	YES	NO
自然獨占廠商利潤	>0	<0	$=0$

2022年期末考第17題

17. 下列我國何種稅目不是由縣（市）地方政府所屬的縣（市）稅捐處負責徵收？

A 地價稅

B 貨物稅

C 土地增值稅

D 使用牌照稅

Answer: B

國稅	地方稅
關稅、綜合所得稅、營利事業所得稅、所得基本稅額、遺產稅、贈與稅、證交稅、期交稅、營業稅、貨物稅、菸酒稅、特種貨物及勞務稅	地價稅、田賦、土地增值稅、房屋稅、使用牌照稅、娛樂稅、契稅、印花稅

2020年

期末考

第8題

8. (10%) 以下為振興券的相關報導節錄：

「振興三倍券可捐給慈善公益團體，對於捐贈抵稅金額如何認定，財政部表示，民眾只支出 1,000 元，但換到的三倍券實際有 3,000 元消費效益，因此可全額列入扣抵，愛心及節稅利益都變三倍。…… 對此，財政部官員表示 …… 雖然民眾只用 1,000 元就換回 3,000 元的三倍券，但最終捐出的三倍券，實際上具有 3,000 元價值，因此最高可以 3,000 元認列捐贈列舉扣除額。」

請回答下列問題：

- (1) (2%) 除了列舉扣除額，計算綜合所得稅另外包含特別扣除額，請簡單比較列舉扣除額與特別扣除額的差異。
- (2) (3%) 請簡單比較扣除額 (deduction) 與扣抵稅額 (tax credit) 的差異。
- (3) (5%) 報導中前面提到捐贈金額可全額列入扣抵，後面又提到可認列列舉扣除額，請問兩者是否有矛盾之處？

答：

- (1) 列舉扣除額與標準扣除額取其高列入綜合所得淨額的計算，而特別扣除額則可直接從所得總額中扣除。此外列舉扣除額與特別扣除額的項目不同。
- (2) 扣除額是在計算綜合所得淨額時可扣除，因此扣除額的租稅利益取決於邊際稅率；扣抵稅額則是計算實際繳納稅額時可減除項目，其租稅利益與邊際稅率無關。
- (3) 全額可列入扣抵寫錯了，這也是一般常見對於稅制的誤解。
